Professional Summary

Full Stack Developer with 2+ years of experience building scalable, production-ready backend systems using Node.js, Express.js, and MongoDB. Experienced in designing RESTful APIs, implementing JWT-based authentication with RBAC, and optimizing database performance. Strong focus on backend architecture, scalability, and real-world application development.

Technical Skills

Programming Languages: Java, JavaScript, TypeScript (basic)

Frontend: HTML, CSS, Bootstrap, Tailwind CSS, React.js, Redux

Backend: Node.js, Express.js, Spring Boot

Databases: SQL, MongoDB (aggregation, indexing, schema design)

Tools: Git, GitHub, Postman, ClickUp, Docker(basic)

Concepts: OOP, REST API Design, JWT, RBAC, Scalability, System Design, CI/CD basics

Cloud: AWS (EC2, S3, Lambda, RDS, IAM, CloudWatch)

Work Experience

Full Stack Developer

Hisan Labs Pvt. Ltd.

June 2024 – July 2026

- Designed and developed scalable RESTful APIs and microservices using Node.js and Express.js, reducing server response time by 30%.
- Integrated third-party APIs and optimized MongoDB queries to improve system performance.
- Collaborated in an Agile team environment to deliver high-quality features within sprint timelines.
- Built secure backend APIs using JWT authentication, ensuring protected access to sensitive resources.
- Implemented role-based authorization with middleware to control access based on user permissions.

Full Stack Developer Intern

Amstech Incorporation Pvt. Ltd.

Sep 2022 – Feb 2023

- Developed full-stack CRUD applications using the MERN stack.
- Contributed to backend logic and participated in peer code reviews.

Projects

Online Commerce Platform

Node.js, Express.js, MongoDB

- Developed backend services for merchant-focused commerce operations, including product listings, user management, and order workflows.
- Implemented cashback and loyalty mechanisms to improve customer engagement and retention.
- Designed RESTful APIs for product search, filtering, and transaction handling.
- Optimized MongoDB queries using indexing, improving search performance and reducing response time.
- Ensured secure API access with proper request validation and error handling.

Rent & Facility Management Platform (Backend)

Node.js, Express.js, MongoDB, REST APIs, JWT

- Migrated backend business logic from Next.js API routes to a standalone Express.js backend to improve scalability, maintainability, and separation of concerns.
- Designed and implemented secure RESTful APIs for user authentication, facility listings, bookings, and platform workflows using JWT-based authentication.
- Structured database schemas and optimized MongoDB queries to efficiently manage property listings, search filters, and booking transactions.
- Implemented role-based access control (RBAC) to manage permissions for administrators, renters, and startup users.
- Improved overall backend performance and code modularity by organizing routes, controllers, and services using layered architecture.

Online Examination And Assessment Platform

Node.js, Express.js, React.js, MongoDB

- Developed backend APIs for managing exams, question banks, submissions, and automated result evaluation.
- Implemented role-based access control for students and administrators to ensure secure operations.
- Designed RESTful services for question management, exam scheduling, and performance analytics.
- Implemented validation and secure handling of user inputs to maintain data integrity.
- Optimized database queries, reducing result processing time and improving system responsiveness during peak usage.

Education

Master of Computer Applications	2025
SAGE University, Indore	
Master of Business Administration (Public Administration and Policy)	2022
School of Social Sciences, Devi Ahilya University, Indore	
Bachelor of Science (Computer Science)	2020
Devi Ahilya University, Indore
